Projects

HomeScholar

Partner/Collaborator

- <https://homescholar.herokuapp.com/>
- Application made for homeschooling parents that helps them organize assignments and create a lesson plan using a calendar.
- Full Stack Application built using NodeJs, Vue.js, and MongoDB in collaboration with 3 other developers.

4Sight

Partner/Collaborator

- <https://sp4sight.herokuapp.com/>
- A "Trello" inspired application where users can create boards and lists to manage tasks
- Users can add collaborators to boards to complete group projects in an organized manner.
- Built with a focus on partner programming
- Full Stack Application built using NodeJs, Vue.js, and MongoDB

Keepr

- <https://sp4sight.herokuapp.com/>
- A "Pinterest" inspired app where users can create and store "keeps" in "vaults" to share with others.
- Full Stack Application built using NodeJs, Vue.js, and MongoDB

Profile

Full-stack Software developer with a passion for problem solving. Well-rounded in both server development as well as front-end styling. Strong communicator with extensive experience in customer service. Highly motivated to expand skill-set and develop real-world applications. Go above and beyond to ensure customers, coworkers, and clients are listened to and respected to create a more productive environment.
